

Cold Chain Packaging Solutions Leader

DIAGNOSTIC/SAMPLE COLLECTION

SIMPLIFYING THE COLD CHAIN

A patient-centric supply chain is inherently complex, and the idea of putting delicate samples in the hands of someone who does not understand the importance of temperature control is concerning. Peli BioThermal's easy-to-use temperature controlled packaging solutions bring peace of mind to those waiting for delicate samples and diagnostics to arrive.

Peli BioThermal's single-use and reusable refrigerated shippers are easy enough for patients or medical professionals not trained in temperature control to use. Innovative NanoCool™ shippers require no conditioning. Just one touch of a button activates the cooling process for refrigerated samples, bringing a room temperature sample slowly to 2-8 degrees Celsius.

Sustainability

Rent. Reuse. Recycle. We're on a journey to protect our environment and our planet one package at a time.

Innovation

Our team thrives in the area between problem and solutions to develop cold chain packaging innovation.

Reliability

Our customers trust us with their most valuable, health-giving and life-saving products.

PELI
BIOThERMAL™

Thermal packaging solutions on a global scale

Peli BioThermal's innovative single-use and reusable thermal packaging products are used by leading global life science industry companies and organizations in pharmaceuticals, biotech, laboratory, diagnostics, and military/government sectors to protect and safely transport their most critical temperature-sensitive tissues, biologics, diagnostic devices and vaccines. We offer the most diverse and trusted selection of cold chain packaging solutions, worldwide manufacturing and service centers staffed by cold chain engineering experts and provide an easy-to-use, web-based asset management service that allows organizations to track individual shipments from start to finish while setting up automated reminders for key logistics processes.

PERFORMANCE YOU CAN DEPEND ON

All Peli BioThermal products are qualified against the highest standards, including the ISTA 7D standard.
